

How to Use AKLIEF[®] (trifarotene) Cream, 0.005%

A SIMPLE DAILY ROUTINE

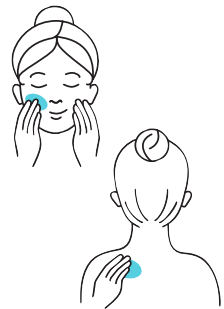

It's simple to make AKLIEF Cream part of your daily evening skin care routine. Applying the recommended amount, following your dermatology provider's instructions, and using AKLIEF Cream consistently on your face, chest, shoulders, or back can help keep acne from getting in your way.

1 CLEANSE

Gently cleanse the area to be treated with a mild or soap-free cleanser (such as Cetaphil[®] Gentle Skin Cleanser).
Avoid using skin products that may dry or irritate your skin.

2 APPLY

Once skin is dry, apply a thin layer of AKLIEF Cream to the affected areas once a day, in the evening.
Use 1 pump for your face and 2 pumps to cover your chest, shoulders, and back. You can use an additional pump to cover middle or lower back if needed.

3 MOISTURIZE

Let AKLIEF Cream dry before applying moisturizer.
Moisturize your skin with a product (such as Cetaphil[®] Moisturizing Lotion) as often as needed to help minimize skin dryness and irritation.

4 AVOID SUN

Minimize your exposure to sunlight. Use a sunscreen with SPF 15 or higher (such as Cetaphil[®] DermaControl Oil Absorbing Moisturizer with SPF 30) and wear protective clothing.
Avoid using sunlamps, tanning beds, and ultraviolet light during treatment with AKLIEF Cream.

Indication: AKLIEF[®] (trifarotene) Cream, 0.005% is a retinoid indicated for the topical treatment of acne vulgaris in patients 9 years of age and older. **Adverse Events:** The most common adverse reactions (incidence $\geq 1\%$) in patients treated with AKLIEF Cream were application site irritation, application site pruritus (itching), and sunburn.

IMPORTANT SAFETY INFORMATION

Indication: AKLIEF[®] (trifarotene) Cream, 0.005% is a retinoid indicated for the topical treatment of acne vulgaris in patients 9 years of age and older. **Adverse Events:** The most common adverse reactions (incidence $\geq 1\%$) in patients treated with AKLIEF Cream were application site irritation, application site pruritus (itching), and sunburn. **Warnings/Precautions:** Patients using AKLIEF Cream may experience erythema, scaling, dryness, and stinging/burning. Use a moisturizer from the initiation of treatment, and, if appropriate, depending upon the severity of these adverse reactions, reduce the frequency of application of AKLIEF Cream, suspend or discontinue use. Avoid application of AKLIEF Cream to cuts, abrasions or eczematous or sunburned skin. Use of "waxing" as a depilatory method should be avoided on skin treated with AKLIEF Cream. Minimize exposure to sunlight and sunlamps. Use sunscreen and protective clothing over treated areas when exposure cannot be avoided.
